

Installation

Function	Description
Step 1	Install the file setup_NinjaAutoprovEdit_v2.msi
Step 2	Install the file setup_NinjaAutoprovisioning_v205.msi
Step 3	Enter the main page "NinjaAutoprovEdit". <i><a href="http://<IP Address>/NinjaAutoprovEditor">http:// <IP Address>/NinjaAutoprovEditor</i> (http://localhost/NinjaAutoprovEditor) <i>Default LOGIN data after installing the provisioning system:</i> <i>User name : 1</i> <i>Password : 1</i> <i>- Now the service is available in a TRIAL Mode (Demo) -</i> <i>By using the TRIAL mode you can use all functions and features. The phone plays every 45 seconds an audio teaser for all parties that you are using a TRIAL version.</i>
	Import license, Full version
Step 4	Click at the upper navigation "License". Send the shown CPU ID to your contact at Global IP Telecommunications (see example below). The following information are needed for creating your license key: <i>- CPU ID (example below)</i> <i>- URL of your autoprovinsing service (e.g. http://provisioning.company.com/)</i>
Step 5	You will receive your license key by mail. Click "Open" to choose the license key and then click " Update license key ".
Step 6	After importing the license key the audio teaser won't be longer played after restarting the phone.
